

CASE STUDY

Enhanced Project Management Solution for Multinational Mining and Crude-Oil Company

SERVICE

Enterprise Project Portfolio Management,

SITUATION

As part of an enhanced project management solution initiative, FTI Consulting was engaged by a Fortune 500 global multi-metals company to support the optimization and execution efforts managing and controlling their project sites located in Australia, Europe, North America.

OUR ROLE

- FTI Consulting assessed the Client’s current operations to identify areas of opportunity and delivered an implementation plan to transform the business from the use of disparate systems and tools to a single project management solution integrated with their ERP solution
- FTI Consulting leveraged our proven methodology and delivery framework to successfully implement EcoSys across the three regions.
- FTI Consulting combined their Enhanced Industry Standard EcoSys Configuration with additional custom configured modules to bring the Client’s vision to reality

OUR IMPACT

Optimization efforts set the foundation for the design, configuration, and deployment of a standardized and enhanced project management solution

Provided additional benefit by transitioning the client from manual reporting practices to automated self-serve reporting.

Streamlined project management activities across three regions, within a single environment.
